Playing The Trifecta

50¢ Minimum “Part Wheels”

The favorite of many **TRIFECTA** players, the “part wheel” variation is virtually the same as a basic wheel, except that you can **exclude** as many horses as you want. This allows you to build some very creative tickets using the 50¢ minimum base wager.

The chart does not cover all possible combinations. The selection of which combinations to include was based on the most probable combinations players would use and an upper limit of \$25 for a single ticket.

HOW TO READ THE CHART

Example 1: **1 234 34567** means one horse in the win position, three horses in the place position and five horses in the show position, **two of which are horses that are also in the place position (#3 and #4).**

Example 2: **12 12 3456** means two horses in the win position, the **same two horses** in the place position and four horses in the show position.
